## EXTREME UNITS

**Extreme Dial-A-Mix**

*w 4/2L Cabinets*

**Extreme 2-Button**

*w 2/5L Cabinets*

**Extreme 1-Button**

*w 1/5L Cabinet*

Extreme units can dispense one-, two- or multiple concentrates for filling bottles, buckets or both. They can be configured to fully meet the customer's cleaning needs while accommodating any space limitations.

All Genesan dilution control units may be ordered set-up and will arrive ready for installation. All units include mounting hardware and a laminated color instructional wall chart.

Please speak to your Genesan Representative to discuss your specific needs.

# DILUTION CONTROL OPTIONS

## POD DUAL-FLOW TRIGGER

Designed for those locations where on-the-wall units are not practical. The Dual Flow Trigger mounts directly on 2L POD concentrates. Once attached to a water source, it can be set to fill both bottles or buckets. Twist-on foaming attachment available.

## SQUEEZE & POUR BOTTLE

Reservoir

A convenient option when wall-mounted dispensing is not preferred.

Loosen cap, gently squeeze bottle to fill reservoir. Remove cap and empty contents into filled bottle or bucket.

## PODIUM.4

Small footprint option when space is at a premium. Accepts up to four POD (2L) bottles.
