

DILUTION CONTROL

DUAL FLOW POD TRIGGER

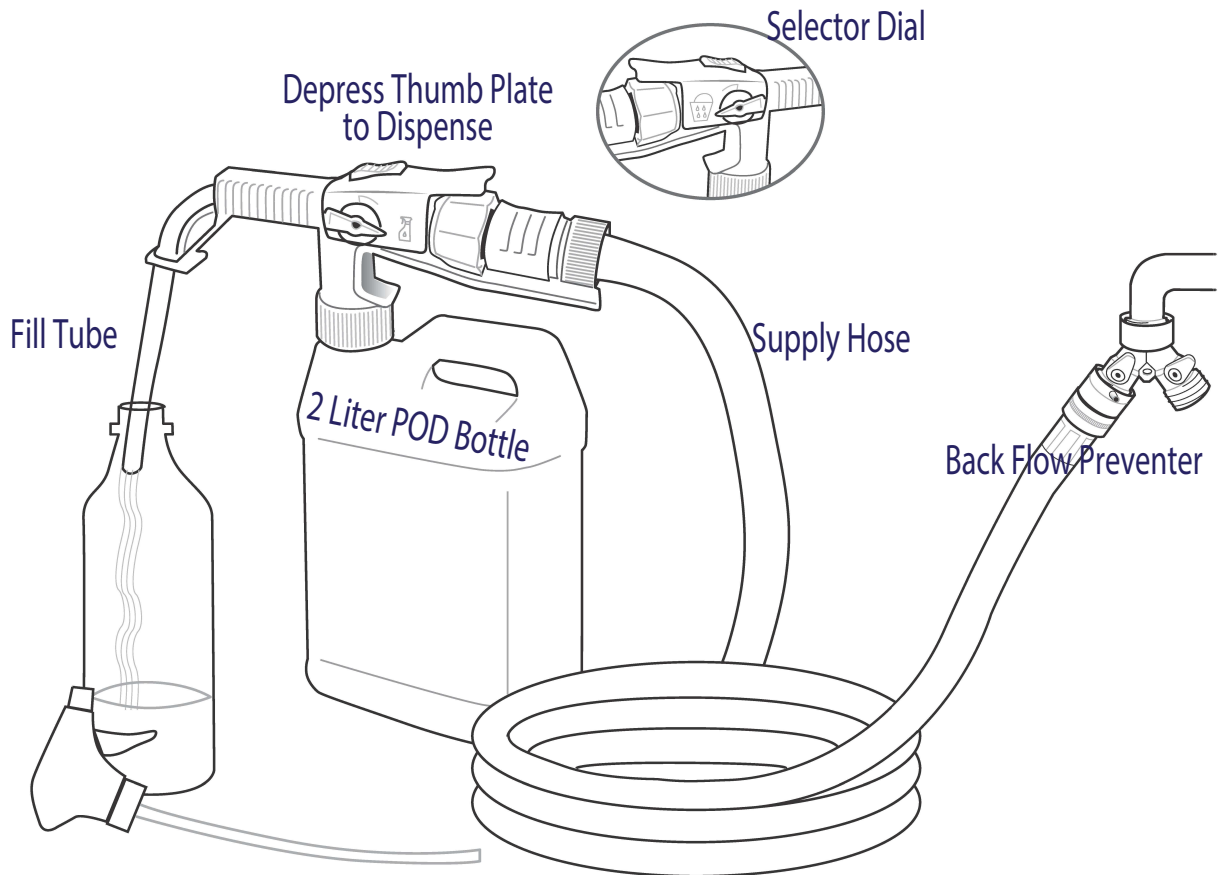

Dual Flow POD Trigger

Genesan's portable Dual Flow Trigger takes dilution control off-the-wall and puts it right in your hand. Fill bottles, buckets or scrubbers anywhere there's a faucet. Designed to work with our internally tipped POD 2-liter concentrates, the dual flow feature allows you to fill either bottles (1 GPM) or buckets (4 GPM) just by turning the selector dial.

An optional POD Hook-up Kit is available as well as a foaming attachment for cleaning showers.

Please speak to your Genesan Representative to discuss your specific needs.
